

Orbit Digital — Supplier RFP Response

Synthetic classroom proposal — no confidential supplier data

1. Executive Summary and Understanding

Orbit Digital offers strong delivery experience and references with medium pricing. The proposal demonstrates mature support practices and several comparable engagements, but the integration architecture is described at a high level and leaves some interface and scalability details open.

2. Proposed Solution and Implementation Approach

- Cloud integration hub with API gateway and workflow services.
- Reusable connectors for common enterprise systems.
- Central monitoring and operational dashboards.
- Integration topology is described conceptually; detailed interface specifications will follow discovery.

3. Timeline, Team Structure and Milestones

Proposed delivery team: program manager, solution architect, integration engineers, QA lead, DevOps engineer and security specialist.

Phase	Duration	Milestone
Discovery	5 weeks	Interface and dependency assessment
Build	15 weeks	Connector development
Validation	5 weeks	Integration and business testing
Launch	3 weeks	Production rollout and support transition

4. Commercial Proposal and Assumptions

Component	Price
Implementation	\$520,000
Annual support	\$78,000
Optional connectors	\$80,000
Total first-year estimate	\$678,000

Assumptions: prices exclude applicable taxes; client provides required environments, SME availability and timely approvals; optional items are excluded from the base implementation estimate.

5. Security, Compliance and Risk Controls

- Encryption in transit and standard identity controls.
- Operational logging and incident procedures.
- Security controls are summarized; detailed certification evidence is limited.

6. Support Model, Relevant Experience and References

- 24x7 production support and named account manager.
- Five comparable transformation and integration references.
- Quarterly service reviews and continuous improvement backlog.

7. Key Risks and Dependencies

- Integration architecture is high-level and needs discovery before detailed sizing.
- Some security evidence is summarized rather than fully documented.
